F1000Research

Dear Editors,

Please consider my submission, "A clinical test for crowding" for publication as a Method Article in *F1000Research*. All authors agree to the submission of this article. This is a novel article, and has not been submitted or published anywhere else.

I have identified the following people (F1000 experts) as appropriate reviewers of this article:

Arnold Wilkins
Chris Tyler
Robert Massof
Cong Yu
Takeo Watanabe
Michael Goldberg
Bruce Miller

I will be most grateful if it works out that this article is published by January 19, which is my last opportunity, by NIH rules, to inform the study section that will review my pending grant proposal on February 18. This *F1000Research* article proves that my method works.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Denis Pelli".

Denis Pelli
Professor of Psychology and Neural Science

p.s. Our research has been **approved by the relevant institutional human subjects committees:**

Approved by NYU University Committee on Activities Involving Human Subjects IRB#13-9694; Anglia Ruskin University Faculty Research Ethics Panel #FST/FREP/151538; Ethics Committee of the IRCCS Fondazione, Santa Lucia Rome (Prot. CE-PROG.480); Work at the Dementia Research Centre was ethically approved by the NRES Research Committee London - Queen Square (05/Q0512/47).
